

LAMY Project

FPT has been cooperating for 20 years with LAMY, the writing implement manufacturer based in Heidelberg.

FPT has developed a container logistic system for LAMY. In addition, robot systems are installed for radial matting, surface finishing (sandblasting) and laser treatment of pen sections.

The current project is the assembly of the new LAMY writing implement called "PICK UP". The FPT system is used for assembling six implements consisting of 60 individual parts.

Cycle time for assembly: approx. 20 sec. /implement

The LAMY company produces exclusively in Heidelberg. The innovative technology helps to safeguard Germany as an industrial place.
